Sizes
A4-A6

Your time is precious

No-one in business can afford to stand still. Choose a copier that's as responsive as you're required to be.

Versatile output

250 sheets of A4 paper can be accommodated in the copier's front-loading pull-out cassette tray. Should you wish to copy on to smaller paper sizes (down to A6), you can load up to 50 sheets of your chosen stock into the NP6512's stack bypass, which will also take transparencies, labels, coloured paper or card up to 128gsm. For added flexibility, the copier will accept any kind of original including books and 3D objects up to 2kg in weight.

Ready for action

You'll never be held up by the NP6512. Canon's unique Surface RAPID™ Fusing System uses a special element which heats instantly whenever you make a copy, so there's no need to wait while the machine warms up. When compared with other copiers, this technology achieves energy savings of up to 59%, which helps your budget as well as the environment.

Fixed-position copying

Foldaway 50 sheet bypass tray for transparencies, card, labels or small size paper

Front-loading 250 sheet A4 paper cassette

instant success

The NP6512 is a compact, desktop machine that brings quality copying to the heart of your business. Delivering 12 A4 copies every minute, it will handle all copy sizes from A4 down to A6 - as well as giving you the full benefit of Canon's advanced instant warm-up technology.

Enhance your image

The quality of your copies reflects the
quality of your work. Aim high with
the NP6512.

NP6512

Zoom
70-141%

Photo Mode

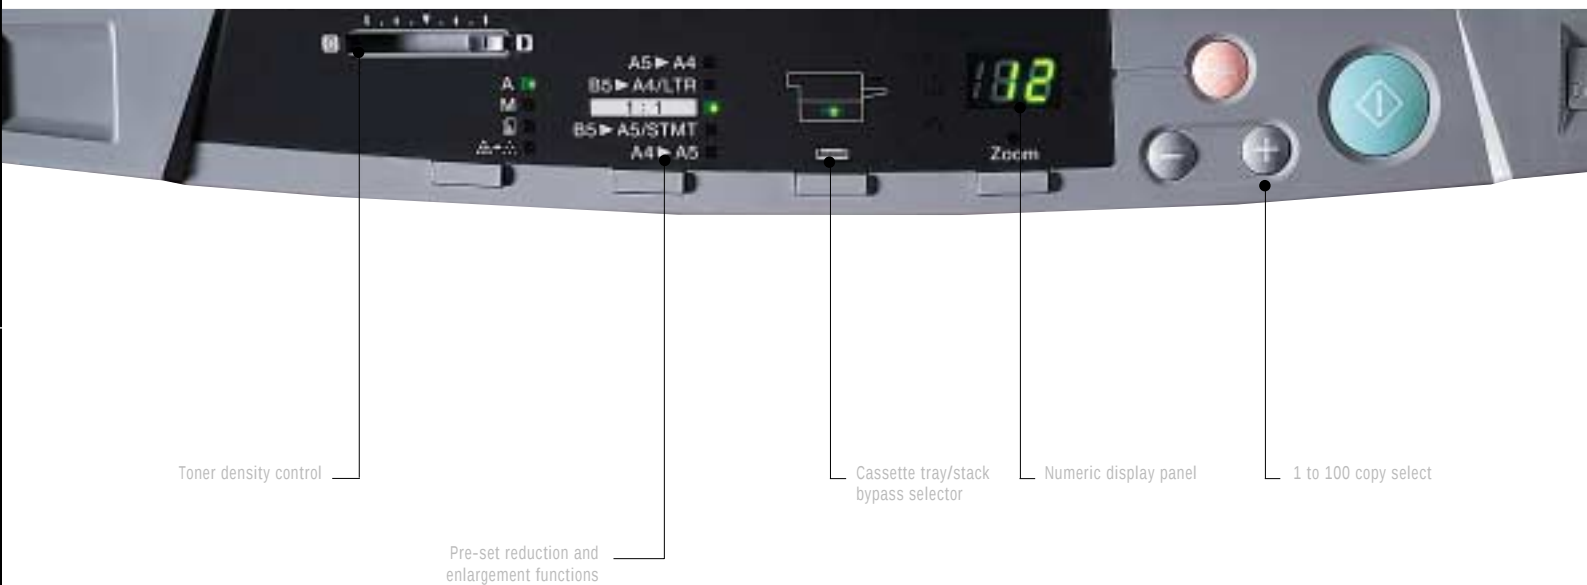

Effortless enlargements

The NP6512 has a generous zoom range of 70% - 141%, enabling you to enlarge or reduce your originals from A4 to A6. There are four pre-set zoom ratios ready for selection on the control panel: B5 to A5 and A4 to A5 (reduction), plus A5 to A4 and B5 to A4 (enlargement). Alternatively, you can make manual adjustments to the zoom ratio in 1% increments.

An eye for quality

The copier's automatic exposure function determines the optimum copy quality in terms of light and dark, without you having to lift a finger! A manual exposure button is also provided for occasions when you prefer to take control, while the NP6512's photo mode improves the reproduction of photo's or originals with halftones.

An optional cabinet for the NP6512 provides a convenient storage facility for paper and toner supplies

sizeable benefits

Despite its compact size, the NP6512 boasts features such as automatic exposure and flexible zoom facilities which you might normally only expect from a larger machine. Yet every function is easy to perform, thanks to the simplicity of the copier's intuitive control panel.

Easy Does it

Every day in business brings its own new challenges. With the NP6512, you can be sure that photocopying will not be one of them.

NP 6512

Environmentally
Responsible

Easy access

The NP6512's front loading cassette makes replenishing the paper supply easy while its pivoting clamshell design ensures that all the internal parts are easily accessible. Changing the toner is a quick, clean process which can be accomplished in a matter of seconds - all you need do is replace the toner tube.

Cutting Costs

The NP6512's energy saver feature automatically reduces the copiers' power consumption when not in use, while its toner save mode allows you to make copies at a lower than normal exposure, saving toner and reducing running costs.

Environmentally responsible

Ozone emissions from the NP6512 are virtually nil, which is good news for the environment. To aid in the recycling process, each copier is assembled using coded plastics - a perfect example of Canon's commitment to the development of environmentally-responsible technology.

The toner tube slides out for quick, clean replacement

perfect partnership

When you are working to tight deadlines, you need a copier that's ready for action at a moment's notice. The simplicity and responsiveness of the NP6512 combine to ease everyday pressures in the workplace. Let the Canon NP6512 take care of your copying, and your people will be free to concentrate on their high priority tasks.
