Preliminary

KX-T7665

New Cost-Effective Digital Proprietary Telephone

This new digital telephone is equipped with eight programmable CO keys for one-touch access to Panasonic's powerful digital PBX features. The 16-character LCD shows you Caller ID, time and date, and other information. The KX-T7665 gives you smooth, efficient communication.

16-Character LCD

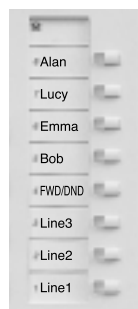

The one-line, 16-character display shows you the caller's name and telephone number*, so you're ready to provide good customer service the moment you answer. It also shows the date and time, call duration, calling extension's number, and other useful information.

* To see the caller's name, the name and number must be registered in the PBX. To see the caller's number, you must subscribe to ISDN or an Analogue Caller ID Service.

Tilt-Angle Adjustment

The telephone adjusts to either of two angles for easier use and a smaller, space-saving footprint.

Programmable CO Keys with Dual-Colour LED

These eight keys can be assigned to PBX functions such as Call Forward (FWD)/Do Not Disturb (DND) and Conference. Each has a dual-colour LED that shows the line status, extension status, on/off, and other information.

Digital eXtra Device Port (XDP)*

The Digital XDP allows you to increase the number of digital telephones without the need for additional cards, thus letting you improve your productivity.

* Digital XDP is only available when you use KX-TDA100/200 Ver.1.1 or later.

Message/Ringer Lamp

The easy-to-see lamp illuminates to indicate when a call comes in, so you can tell when the telephone is ringing even from a distance. It also notifies you that someone has left a message.
